Section 2I. Required consultation or coordination between the lead agency and/or the RFO and another governmental unit including tribes:

Easements, permissions, or permits:

Access permission will be required.

Obtain a CWA permit prior to debris removal in channel.

Obtain a Water Quality Certification from LA DEQ

Obtain a Consistency Authorization permit since the location is in a coastal zone.

Mitigation Description:

Access debris from only one side of the channel whenever possible. Work should be conducted from the north or west side of channel. Remove only Katrina related debris.

Debris will be disposed of on-site, approximately 20 feet away from the creek, but within the 100 foot Drainage District easement. Where lawns and pastures are present, debris will be hauled to a wooded location within the 100 foot easement. Action will be completed without interruption to minimize impacts on wildlife and nearby residents.
